

PRESS RELEASE

Alianz and IPM Global Announce Partnership to Deliver Powerful Project Management Solution, Built on Microsoft Technology, to the Construction / Engineering Industry.

Vancouver, British Columbia – (July 8th, 2015) – IPM Global has announced a strategic partnership with Alianz to deliver the IPM suite of applications to Construction and Engineering clients in Canada who are seeking better ways to manage their projects and take advantage of an existing or planned Microsoft technology investment. Built on the Microsoft Dynamics CRM platform, IPM runs inside of MS Outlook, seamlessly integrating emails, contacts, tasks and calendars in day-to-day operations. The familiarity of the environment, flexibility in customization, and the scalability of the solution provide project managers with a solution that is first-to-market in performance.

“IPM Global is thrilled to have Alianz represent our project management solution,” stated Miree LeRoy, Partner Director for IPM Global. “Alianz has years of experience providing a broad range of development and creative services to a large selection of companies from startups to enterprise, and now this partnership allows them to provide construction and engineering firms in Canada with access to and support for IPM Global’s project management software. IPM is a perfect fit for the markets they serve.” LeRoy finished.

“Alianz is dedicated to transforming enterprise businesses with our proven methodologies and leveraging industry leading cloud software.” said Patrick Kleine, Managing Partner at Alianz. “IPM Global have proven themselves within the Microsoft CRM community and delivered an outstanding product.”
