***Constructech* Recognizes Commercial Top Products for 2016**

Carol Stream, Ill. – March 8, 2016 – The editors of *Constructech* magazine announce the 2016 Commercial Top Products award winners, highlighting a range of software and applications that have made tremendous strides in the technological evolution of the commercial building industry.

In the construction industry, companies that are the first to adopt new devices or technology can easily gain a competitive edge. Behind the scenes, a handful of technology providers have been working to develop these new solutions that demonstrate why they have been vying for their chance in the spotlight.

Constructech magazine editors announced and judged the Commercial Top Products winners, in an effort to guide commercial contractors in making the best choices for their companies by highlighting groundbreaking products in terms of innovation and functionality.

“It is an exciting time to be a commercial contractor. We had the opportunity to see and judge a plethora of both New and Trusted Products designed specifically with the construction industry in mind,” says Peggy Smedley, editorial director, *Constructech* magazine. “The 2016 Commercial Top Products winners are truly demonstrating they understand what the construction community needs and are focusing on delivering those innovative solutions.”

Winning products place in either a New Product or a Trusted Product category. New Products are based on newly introduced products and technology offerings that have been in the market for less than two years. Trusted Products are those core technology offerings in the market for more than three years. This category also includes upgrades or enhancements to existing products.

The recipients of *Constructech's* Commercial Top Products for 2016 are:

Trusted Products:

- Aconex Platform by Aconex
- Assemble Insight by Assemble Systems
- BIM 360 by Autodesk, Inc.
